

**Logistics Qualification System Program: LQSP PLUS**  
**Certified Logistics Professional Course 2018**

The development of logistics systems in Thailand's industrial sector is important to the competitiveness of manufacturing and service sectors. Technology advances have played a role in developing and optimizing the processes of logistics system. Human resource development is a key factor in logistics development. Japan is the model of successful logistics personnel development that strengthen the industrial and economic sectors of country.

Thai National Shippers' Council (TNSC) collaborated with the Japan Institute of Logistics System (JILS), Japan External Trade Organization (JETRO) and Sripatum University (SPU) set up the training course as Logistics Qualification System Program (LQSP) by using the content and qualification system of Japan as a model with minor adaptation to suit the industrial environment in Thailand. In 2018, TNSC revises the content of Logistics Qualification System Program (LQSP) to be more appropriate for current logistics and supply chain management and renamed to "LQSP Plus". Additionally, digital logistics and disruptive technologies or related issue are added in this training program. Trainee will learn the benefits of using digital technologies to support logistics activities and manage the logistics and supply chain in your company more efficiently.
